ERAVCO is a leading manufacturer of AC capacitors, pressure controls, and service equipment headquartered in Boca Raton, Florida (USA). The company sells its products worldwide to Authorized Distributors and Original Equipment Manufacturers (OEMs).

Markets for VACCAP products include residential and commercial air-conditioning, refrigeration, special applications such as recovery and recycling equipment, as well as automotive and heat pump systems

Product offering

We offer a full line of general purpose AC capacitors including motor run and fan capacitors. Our capacitors range from 2.5µF to 100µF in round and oval, single and dual types with voltages ranging from 115-450VAC.

Standards

VACCAP products are manufactured at a state-of-the-art ISO9001:2008 facility. Our products are RoHs compliant and are UL & CE approved.

Innovation

VACCAP is actively contributing to customers cost reduction programs and providing customers with innovative products to fit their customized applications .

Services

VACCAP offers a variety of services, including stocking programs, customized packing and private label programs. The company has extensive experience in export operations, including logistics and documentation preparation, as well as multilingual personnel to ensure complete customer satisfaction

Core Values

- Commitment
- Respect
- Empowerment
- Adaptability
- Teamwork
- Excellence

Technology

Metallized polypropylene oil-filled capacitors manufactured by VACCAP offer improved performance and proven reliability in split phase motor, compressor, filter, and general AC applications. The Metallized polypropylene capacitor is self healing. Any defect occurs in the dielectric is automatically “cleared” within microseconds, and the capacitor continues to function at full efficiency. The metallized electrode evaporates around the defect allowing full functionality of the components with negligible capacitance loss

Dual Capacitor Element

The dual, round concentric capacitor element was developed in response to HVAC application requirements. In a typical Air-conditioning system there are two required capacitors, one for the single phase compressor and another capacitor for the fan motor. VACCAP utilizes state-of-the-art winding technology to wind these two capacitors into one concentric element, resulting in a more compact package and increased cost savings.

Single Capacitor Element

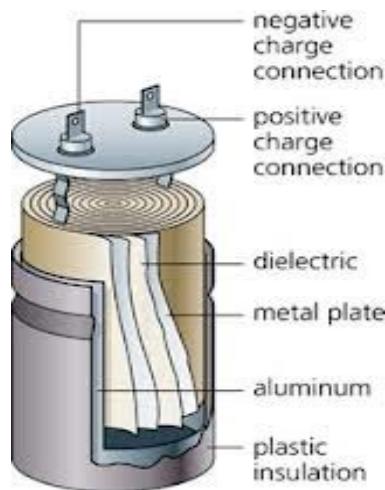

The master rolls of metallized film are split into specific widths based on capacitor model. These rolls are placed on high speed, computer controlled winding machines where the capacitor section is wound into discrete capacitor elements. Once the section is wound, the ends are completely covered with a conductive end-spray and thermally cured to relieve any material stresses and stabilize the capacitance

SINGLE / DUAL; ROUND/ OVAL CAPACITORS

Cover Assembly

The capacitor element is housed in a steel, aluminum, or plastic case with a cover. Both metal housings use a steel cover assembly, consisting of the cover, terminals, and a pressure interrupter. The interrupter is a safety feature applied on all VACCAP capacitors. If the capacitor experiences a failure that disrupts the dielectric system, internal pressure builds up. The interrupter is designed to internally disconnect the tabs from the terminals. This creates an open circuit before allowing the case to rupture preventing a potentially dangerous catastrophic failure.

Final Assembly & Testing

VACCAP capacitors are filled with a specially formulated organic fluid, ECCOL II, which provides optimal heat Transfer, arc suppression, and shock absorption. After filling, VACCAP capacitors are Double roll seamed and tested. 100% of VACCAP Capacitors undergo a rigorous final electrical and quality inspection before being labeled and packed

VACCAP Specs

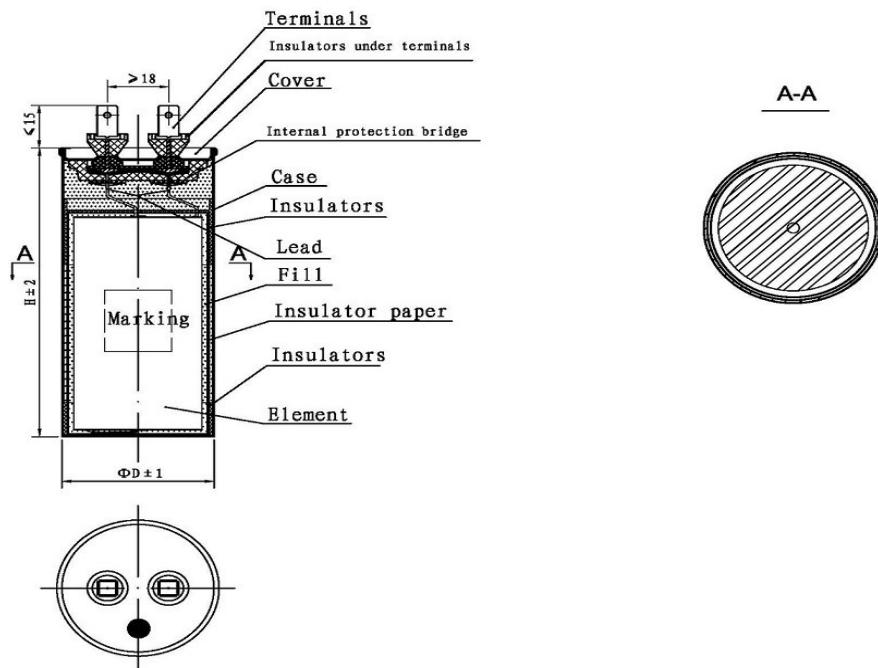

- **Internal Construction:** Self-Healing metallized polypropylene film
- **Dielectric Fluid:** Eccol II, IIIB Liquid NFPA Classifications
- **Cover Material:** Tin Plated Steel
- **Case Material:** Aluminum or Tin Plate Steel
- **Interrupter:** Pressure sensitive, UL Recognized. Rated for 10,000AFC
- **Terminals:** Multiple blades (3 or 4), tinned steel quick connect .025 in (6.35 mm) x .032 in (.0813 mm)
- **Capacitor Tolerance:** ±5% std., ± 3%, and ±10% available

Applications for VACCAP

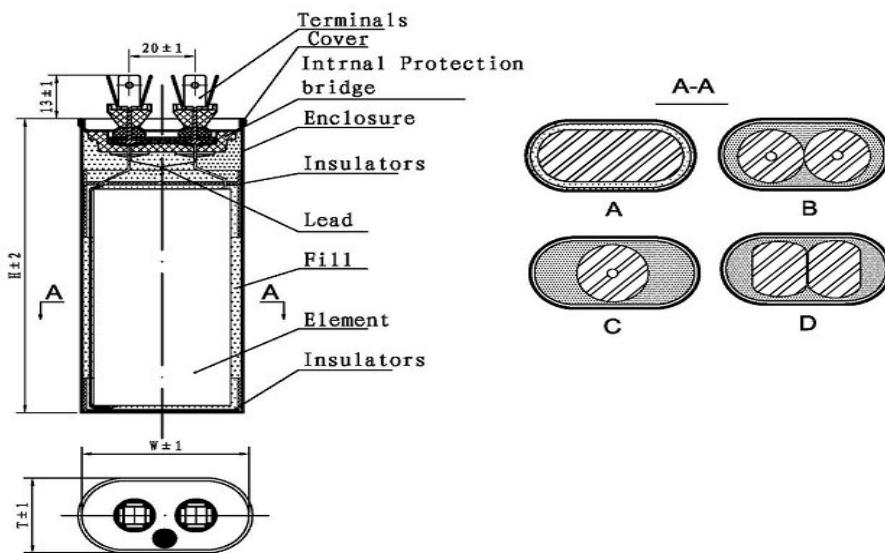

- **Permanent Split Capacitor (PSC)**
Fans, blowers, operations with low starting torque, gate operators, garage door openers, and pumps.
- **Run/Start Capacitor Motors**
High Starting torque requirement
- **Single Phase Compressors**
Refrigeration, Air-Conditioning, Ice Machines, and Heats Pumps

Terms of Sale -

- Terms of sale are subject to the terms and conditions set forth prior to initial order and as stipulated in the order acknowledgment.

Payment Terms -

- All payment terms are negotiated at time of proposal. A credit application must be completed and approved for open terms. For international customers, terms will be Irrevocable Letter of credit or pre-payment. Major credit cards are accepted.

Cancellation policy -

- Orders must be cancelled 3 weeks prior to the scheduled delivery date stipulated in the order acknowledgment. Failure to comply will result in a re-stocking penalty of 25% of order value.

Freight Cost -

- Freight cost will be the responsibility of the customer. ERAVCO will select the freight carrier and forwarder unless otherwise specified by the customer.

Return Policy -

- All returns for warranty replacement or credit will not be accepted without an RAN (Return Authorization Number). Please contact ERAVCO customer service to obtain the RAN#. Material received without an RAN number will be returned back to the customer at the customer's expense.

Warranty -

- One year manufacturing warranty.

ERAVCO reserves the right to revise its terms & conditions without written notice
